Dear families

KHA students have made a super start to the year. We're really proud of the way they have adapted to new systems and initiatives that our community has launched this year - the climate for learning across the school has been excellent.

I had the pleasure of delivering an assembly this week to each of our respective year groups. We spoke about our ambitions for KHA as a school and them as individuals. There are lots of exciting developments and new opportunities happening this year, as we raise the standards of our curriculum, and all aspects of student achievement. Our students' response to this has been wonderful. All year groups have demonstrated renewed enthusiasm and focus on the school work.

Lots of clubs and societies have kicked off this week. There is a range of subject-specific clubs, performing arts societies and sports clubs. Ms Williams will be coordinating our whole enrichment programme at KHA, so more information will follow on this. Please encourage your children to get involved as much as they can.

Finally, I'd like to say thank you to parents for supporting our students to be punctual and smart at the start of the school year - I've been a very proud headteacher standing at the gate each day, welcoming them into the school gates, and this is down to your high expectations of them at home! So, thank you.

Kind Regards

Mr. A. Jones
Headteacher

Introducing the KHA Senior Student Leadership Team!

Trip to Scott Polar Research Institute, Department of Geography University of Cambridge

Ten of our students who worked with their PhD Tutor Rob Law through the Brilliant Club last term, were guests of Rob at the Institute of Polar Research. They had a guided tour of the museum and library by Rob and his colleague Naomi, and learnt so much about how University is accessible for all and about the incredible work the Polar Researchers do.

Whilst at the Institute some of our students briefly met Rebecca Dell, a PhD Student, who will be part of a 60 strong expedition team going to Antarctica in October. Rebecca has said she would very much like to create links with our school and keep us up to date through a blog whilst she is in an Antarctica.

After lunch by the river, we then had a walking tour of Cambridge, taking in the sights and learning about the many colleges of Cambridge University. We were even given permission to enter the courtyard of Trinity College.

The best bit is that all of the 10 students that went are now eager to go to University. This is testament to the great work we all do at KHA in nurturing aspirations and promoting HE through Make Happen and great initiatives such as the Brilliant Club.
